## Datasheet

### Minimum Size and Maximum Performance on Medical Items

EOS-202 U9 RAIN RFID inlay from Tageos is the market's first and (as of July 2021) only RFID inlay to combine a footprint of just 20x10 mm (wet inlay finished size 22x12 mm) with strong performance across all types of item specified in ARC category S for healthcare and pharmaceutical applications.

Due to its outstanding read sensitivity and reliability characteristics, even in dense RFID tag populations, the EOS-202 U9 inlay is viable for use across a broad portfolio of items used for unit-dose medication, including glass syringes, clear and amber liquid glass vials, clear glass powder vials, plastic/COC syringes, and blow-fill-seal vials. That performance edge pays off in a wide range of hospital, pharmacy and inventory management workflows.

EOS-202 U9 RAIN RFID inlay features a sophisticated extra-small antenna design that leverages

the capabilities of NXP's latest UCODE 9 IC. The IC complies with the EPC Class 1 Gen 2 protocol and the ISO 18000-6c standard for global use, and features auto-adjust technology, unique brand identifiers, and pre-serialized 96-bit EPC memory.

EOS-202 U9 inlay is available in dry, wet, and paper-face formats.

Like all Tageos' RFID products, the EOS-202 U9 inlay complies with ISO 9001:2015 Quality Management System and ISO 14001:2015 Environmental Management System, as well as Environmental Directives RoHS and REACH, utilizing sustainable materials such as FSC® certified paper whenever possible.
