Compact and High-Performing Solution for Retail and Beyond

The EOS-261 M830 inlay combines a remarkably small footprint with further enhanced performance on various materials due to the latest generation IC technology. It is an optimal solution for many item-level applications in retail (apparel, accessories, consumer electronics, home goods, toys, etc.), logistics, automotive and industrial manufacturing.

It is available in dry, wet, and paper-face delivery formats.

EOS-261 M830 is based on Impinj's M830 RAIN RFID IC with 128-bit EPC memory. The IC combines improved read sensitivity (-1.5 dB, compared to M730), AutoTune™ performance, and backscatter efficiency with a size reduction to support Tageos' sustainability approach. As a result, the IC sets standards in solutions like high-speed inventory counting, loss prevention with frictionless self-checkout, and

embedded tagging with seamless product returns.

Tageos maintains annual ARC Quality Certification for all its manufacturing sites worldwide and was among the first companies to receive certification from the Auburn University RFID Lab in 2020. EOS-261 M830 complies with ARC specifications F, I, O, Q, R, Y2, W5, and W6.

Tageos complies with ISO 9001:2025 Quality Management and ISO 14001:2015 Environmental Management as well as utilizing sustainable manufacturing processes and materials, such as FSC®-certified paper, whenever possible. In addition, all Tageos products meet the RoHS and REACH environmental directives.
